

Nursing & Allied Health Subjects

Move Students From Memorization To Deep Understanding Of Concepts

Expert tutors will provide personalized support designed to help students move beyond rote memorization of key terms to deep understanding of key nursing concepts. Students will work with tutors in a live, one-to-one environment to address questions about assignments and delve into applications of the concepts. Based upon the questions presented by the student, the tutor will share real-world scenarios designed to strengthen clinical competencies. In addition, students can submit written assignments for review. Tutors will evaluate essays, reports, care plans, and case studies to ensure that the assignment meets good writing standards.

Our nursing tutors have an average of **16 years of clinical experience** and **5 years of teaching experience**.

Nursing tutors carry special degree and licensure requirements: **MSN, RN**

Nursing & Allied Health: Topics Covered And Hours Of Availability

Nursing: Medical/Surgical

Description: Concepts in Nursing practice; Pathophysiologic mechanisms of disease; Perioperative Care; Problems related to: Altered sensory input, Oxygenation due to ventilation, transport, or perfusion; Digestion and Elimination; Urinary function; Regulatory and Reproductive Mechanisms; Movement and Coordination; Emergency and Disaster

Availability: 10AM-6PM PT, 7 Days a week

Nursing: Pharmacology

Description: Pharmacokinetics; Pharmacodynamics; Drug classes and Schedules; Herbal and Nutritional supplements; Drugs for the following systems and their related disorders: Nervous system, Cardiovascular system, Urinary system, Immune system, Respiratory system, Gastrointestinal system, Endocrine system, Integumentary system, Sensory system

Availability: 10AM-6PM PT, 7 Days a week

Nursing: Pathophysiology

Description: Cellular physiology; Genetic disorders; General physiology and disease state physiology of the following systems: Cardiovascular, Lymphatic, Renal, Respiratory, Nervous, Gastrointestinal, Endocrine, Reproductive, Musculoskeletal, Integumentary, Immune, Sensory

Availability: 10AM-6PM PT, 7 Days a week

Nursing: Nursing Care Plans

Description: Assessment and diagnosis; Outcomes and Interventions; Creating the plan; Documenting, Implementing, and Evaluation of the care plan

Availability: 10AM-6PM PT, 7 Days a week

Allied Health: Anatomy and Physiology

Description: Homeostasis; Levels of Organization; Anatomical Terminology; Chemical Basis of Life; Cellular Biology; Histology; Human growth and development; Genetics and Genomics; Structure and Function of the following systems: Cardiovascular, Lymphatic, Urinary, Respiratory, Nervous, Gastrointestinal, Endocrine, Reproductive, Musculoskeletal, Integumentary, Immune, Sensory

Availability: 24/7

Allied Health: Organic Chemistry

Description: Structure and Bonding; Intermolecular Forces; Properties, Nomenclature, Synthesis and Reactions of a variety of functional groups; Acids & Bases; Stereochemistry; Nucleophilic Substitution, Elimination, and Addition reactions; Biochemicals – Structure & Function of Macromolecules

Availability: 24/7

Nursing & Allied Health: Writing

Description: Students will connect with expert tutors in the WriteTutor™ Center. Tutors will evaluate essays, reports, care plans, and case studies to ensure that the assignment meets good writing standards.

Availability: 24/7
